

Introduction

The Fast-Ethernet converter EDX100-L offers one long-haul optical 100BaseFX (1550nm) port plus one copper Ethernet port and provides an economical copper / fiber optic signal conversion.

The copper Ethernet port is configured to 10/100BaseT with auto-negotiation (speed and HDX/FDX). Supporting auto-cross-over (MDIO/MDIX) makes installation very easy, as any Ethernet patch cable can be used.

Fiber optic connections allow long distance Ethernet-links to spread connectivity into a wide area.

The Ethernet bridge - media converter EDX100-L has Link Fault Pass-through (LFP) function, which allows easy tracing of network link failures.

In case of signal loss of fiber optic port, an alarm is triggered for external use.

EDX100-L can be housed in small footprint single-slot housing or 19" rack.

Features

- ▶ Fast Ethernet converter: 10/100BaseT to 100BaseFX
- ▶ Compact design
- ▶ Support of Jumbo-Frames
- ▶ Link Path Through for failure detection
- ▶ Long Haul 1550nm laser

Application

The EDX100-L can be used to bridge long distances, thus enhancing copper Ethernet networks by using a fiber optic line between the branch offices.

Specifications

Network I/F (WAN)

- 1 x 100BaseFX
 - 1550nm, long haul, 29dB Budget, 80km
 - Connector: FC-PC

Service I/F (LAN)

- 1 x 10/100BaseT
 - Auto negotiation, Auto MDIX
 - Connector: RJ-45

Environmental

- Operating: +5 to +40°C
- Storage: -30 to +80°C
- Humidity: 10 to 90%, non-condensing

Power

- ~2.5W
- Input: 5VDC from BP

Physical

- Weight: 150g
- Dimensions:
 - 130mm H x 30mm W x 190mm D
 - 40mm H x 145mm W x 260mm D (in SHX3)
- 19" rack: 24 (10) slots available in SRX24 (SRX10)
